INTRODUCTION

VasTech Uganda Ltd (VTL) is an ICT company incorporated in Uganda, owned and managed by Ugandans and based in Kampala at Plot 167 Ssekabaka Road, Wakaliga.

Our Vision
Providing improved quality and affordable solutions to a wide range of types and sizes of businesses
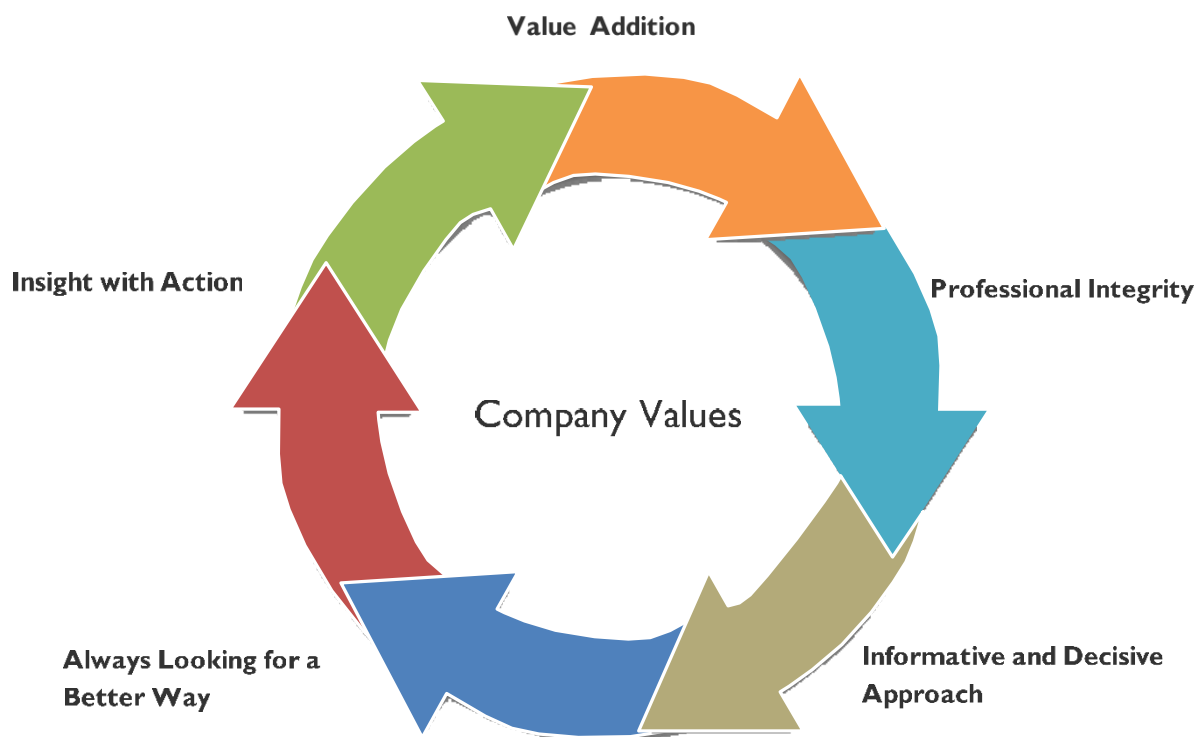

Our Mission
Adding Value to your ICT Investment by providing effective, competitive, result oriented & practical business solutions to the organization to optimize your operational efficiency in order to maximize return on investment & ultimately to achieve your goal.

Company Values
At VasTech Uganda Limited, we passionately believe that corporate values are vital. They help to provide boundaries on how a company conducts business and helps express to our clients the approach adopted by VasTech Uganda Limited.
At VasTech, five key values express our approach to business:

Plot 1164, Block 16 Kabusu Road.
P.O Box 152668, KAMPALA.
TEL. 256 (41) 4 267913, 256-714-640632, 256-772-507484; FAX 256 (41) 267912
www.vastech.co.ug

1. **Professional Integrity**

This manifests itself in asking clients challenging questions and remaining `honest` to a project. We flag up issues that may be controversial and we look to see if there is a smarter way that companies could be operating. We report what we find, even if it's not always the news that clients want to hear. Looking at the way a client organization operates through a `fresh pair of eyes` is one of our most powerful insights and one we preciously guard.

2. **Informative and Decisive Approach**

Some business problems can be intricate, the solutions complex, but our approach is to provide clear and unequivocal solutions designed to make a difference.

3. **Always Looking for a Better Way**

Like the saying goes ' You can't do the same thing over and over and expect the results to be different ' So, we apply ourselves to thinking about how your organization **could** and **should** be meeting customer requirements.

4. **Insight with Action**

We are passionate that even small insight and knowledge, coupled to management action is far more powerful than considerable knowledge that remains idle`. VasTech's focus is always on delivering positive change, through implementing what has been discovered. Voluminous reports that gather dust on shelves play no part in our business.

5. **Value Addition – Making a Difference**

Our motivation comes from leaving an organization stronger than when we arrived. If the difference is not tangible and obvious, then the opportunity has been missed.

About Us

VasTech has a management and staff with high technical expertise and several decades of experience in Information Technology, Mathematics, Statistics, Computer Science, Consultancy, Accounting, Sales & Marketing Management, and Customer Relationships providing the technological cutting edge needed to meet the demands of the ICT industry.

VasTech is, thus, poised and dedicated to keeping abreast of the ever-changing needs of our dynamic world, based on an assessment of individual organizational needs, seeking for ways to bring greater satisfaction & fulfillment in the use of their ICT investments.To this end the team develops & offers affordable, high quality customized & off-the-shelf solutions (products and services) to our clients by adding value to their ICT investment through market-driven research and innovation in such fields as Financial Ac counting, Human Resource Management, Fixed Assets Management, Academic Registry Information Management, Project Tracking and Monitoring and Social Policy Decision Support Systems.

In our determination to grow locally and regionally as providers of improved quality and affordable solutions to a wide range of types and sizes of businesses, VasTech's programming team has already successfully developed and implemented high quality products for the local market in the areas of **Human Resource Management and Payroll Systems, Fixed Assets Management, and Academic Registry Information Management Systems** and are still seeking opportunities to venture into yet more areas critical to the growth and success of businesses such as **Customer Relationship Management (CRM) software** (Electronic Queue Management and Information Displays systems), Hotel Industry software distribution etc...

VasTech is determined to become a leader in innovative, research-based ICT development providing real additional value to already existing software products and creating new solutions for new problems.

Currently we have a growing customer base of over 200 contented clients in Uganda who have made VasTech Uganda Ltd their choice of service provider. (See List of Customers)

VasTech Uganda Ltd is also the exclusive distributor of Sage Pastel accounting software in Uganda taking the lead in providing quality training and support for users of this highly-acclaimed software.
